Election/Restrictions

Applicant's election with traverse of Group I, Claims 1-9 and 12 in the reply filed on 4-18-2008 is acknowledged. The traversal is on the ground(s) that the 371 unity of invention standard should have been applied to the application. This is found persuasive.

The requirement is rescinded.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 10 recite the limitation "the current-voltage phase angle is close to zero" in line 14. There is insufficient antecedent basis for this limitation in the claim and also the "close to" terminology renders the claim vague.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hufford (U.S.Pat.4,825,625).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. *Fishman, Fishman et al., Wirtz, Hufford and Dewan are cited to show structure similar to the claimed invention.
